ARE YOU KEEPING UP?

Vulnerabilities are the most commonly exploited attack method into organizations. And while the volume of reported vulnerabilities is overwhelming, the resources to fix vulnerabilities are limited.

53% of external attacks are carried out by exploiting software vulnerabilities[1]

42% of respondents say it is difficult to prioritize which vulnerabilities are most important.[2]

176 DAYS The average time it takes to fix a vulnerability[3]

With Tenable, you're able to find and fix vulnerabilities faster. Tenable SecurityCenter delivers comprehensive visibility and context that lets you quickly take decisive action.

Visibility Unparalleled assessment capabilities driven by a world-class research team.

Context Clear reports and dashboards put results in context of your environment.

Action Remediation metrics let you track progress and improve your program.

With more than 76,000 checks that cover nearly 30% more vulnerabilities than competitive solutions across 32% more technologies, Tenable has you covered today and in the future.

Don't let vulnerabilities overtake you. Let Tenable be your trusted vulnerability management partner.

Evaluate Tenable solutions today.
